MARTY Sports

Presentation

MARTY Sports is a French company specialized in **Manufacturing, Design, Marketing** and **Installation** of sports equipment and furniture mainly intended for local authorities.

A **100% family-owned company**, it was created in **October 1979** by Raymond and Jeanne Martinez to exploit innovations in the world of athletics, designed by Raymond Martinez, who was a technical executive at the Fédération Française d'Athlétisme.

Their twin sons Laurent and Stéphane took over in 1986 and quickly added their skills in Team Sports and sports hall equipment. Since February 2019 Laurent Martinez has been managing the company.

MARTY Sports Athletics products are **IAAF** certified (International Athletics Federation), **Basketball** recommended by the **FFBB** (French Basketball Federations), **Badminton** classified **FFBAD** (French Badminton Federation).

Football goals are approved by **FIFA** (International Football Federation).

Designing The emergence of European Standards at the end of the 1990s, and also the French decree of June 1996 on the safety of sports equipment (now integrated into the Sports Code), forced **MARTY Sports** to create its own Design Office, which over the years has become a real asset for the company and its customers. The total integration of the design allows us to constantly innovate and support the development of sports, particularly in Athletics, Football, Badminton, Tennis or Basketball, where we work in support of their federations. This also allows us to make a difference from our competitors by offering **MARTY** products. We were also able to integrate eco-design following the completion of our first carbon footprint in 2009

Fabrication

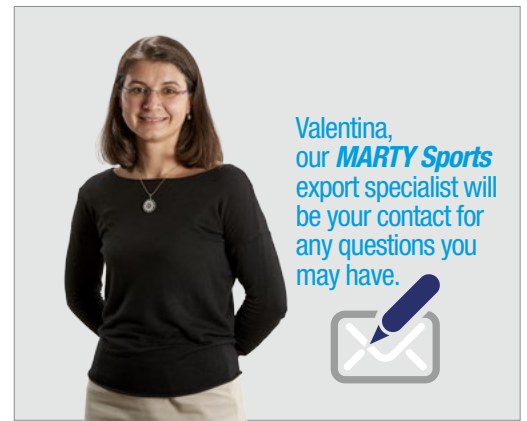

MARTY Sports has been manufacturing since 1981. In order to control quality, we have constantly improved our production resources with modern machines and tools that respect not only working conditions but also the environment, as our factory is located in the countryside. Almost the entire production chain is integrated, from digital cutting of metal or aluminium profiles, manual or automated welding, and finally powder painting on a conveyor.

Commercialization

It is good to design and manufacture, but it is also necessary to commercialize. Since the early 2000s, we have chosen to sell almost everything directly or in very close contact with a network of distributors and installers. MARTY sells MARTY, which allows us to be in direct contact with customers, to be as close as possible to users' expectations and requirements.

For this purpose, our team of technical sales representatives employed by the company is at your disposal with the support of a strong organization administrative staff composed of sales assistants, accountants, a purchasing department and also a shipping department.

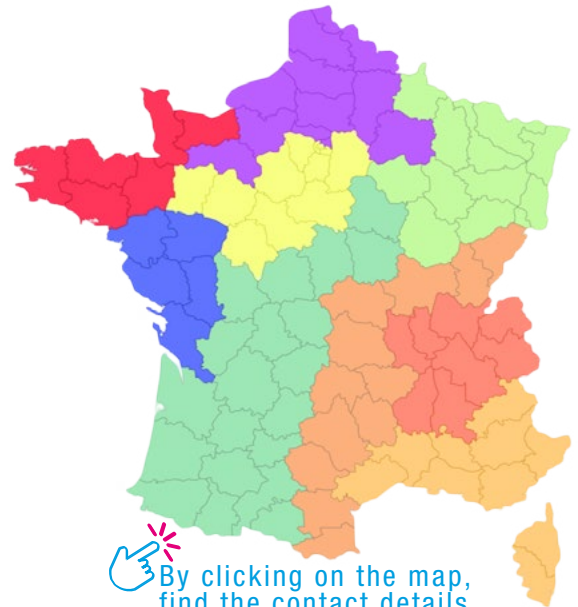

The export is done in relation with national distributors, able to provide the same services as MARTY Sports do in France.

Installation

We have our own specialized and experienced installation teams. Very well equipped, we have our own nacelles.
