MARTY Sports

Presentation

MARTY Sports is a French company specialized in **Manufacturing, Design, Marketing and Installation** of sports equipment and furniture.

A **100% family-owned company**, it was created in **October 1979** by Raymond and Jeanne Martinez to exploit innovations in the world of athletics, designed by Raymond Martinez, who was a technical executive at the Fédération Française d'Athlétisme. The sons Laurent and Stéphane took over in 1986 and quickly added their skills in Team Sports and sports hall equipment. Since February 2019 Laurent Martinez is managing the company.

MARTY Sports' Athletics products are **WA** certified (World Athletics), **the Basketball solutions** recommended by the **FFBB** (French Basketball Federations), and **Badminton is FFBAD** (French Badminton Federation) classified.

OurFootball goals are approved by **FIFA** (International Football Federation).

Design

The emergence of European Standards at the end of the 1990s, as well as the French decree of June 1996 on the safety of sports equipment (now integrated into the Sports Code), has led to that **MARTY Sports** created its own Design Office, which over the years has become a real asset for the company and its customers. The total integration of the design allows us to constantly innovate and support the development of sports, Athletics, Football, Badminton, Tennis or Basketball are fields where we work hand in hand with the national federations. This also allows us to make a difference from our competitors by offering **MARTY** products. We were also able to integrate eco-design following the completion of our first carbon footprint in 2009

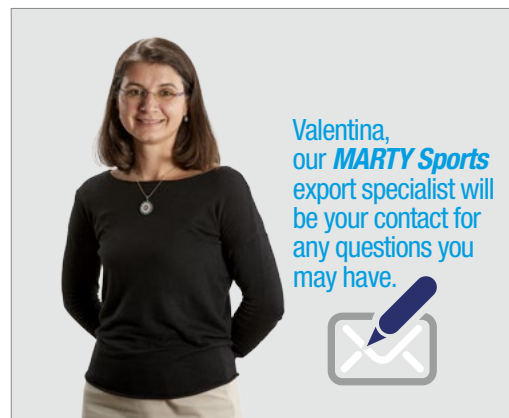

Manufacturing

MARTY Sports has been manufacturing since 1981. In order to control quality, we have constantly improved our production resources with modern machines and tools that respect not only working conditions but also the environment, as our factory is located in the countryside. Almost the entire production chain is integrated, from digital cutting of metal or aluminium profiles, manual or automated welding, and finally powder painting on a conveyor.

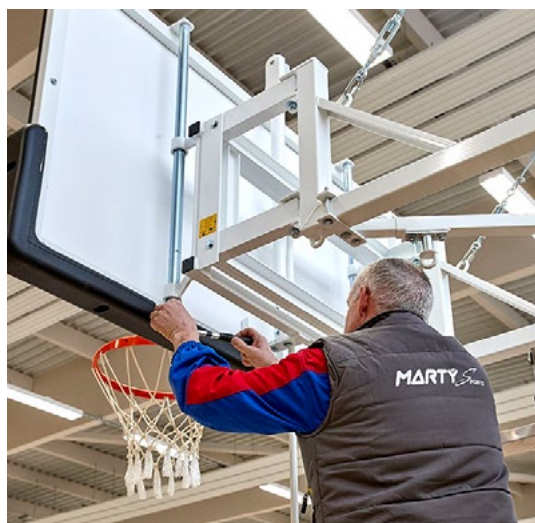

Sales

Since the early 2000s, we have chosen to sell almost everything directly or in close collaboration with a network of distributors and installers. MARTY sells MARTY, which allows us to be in direct contact with most of our customers, to be as close as possible to users' expectations and requirements.

For this purpose, our team of technical sales representatives employed by the company is at your disposal, together with the support of sales assistants, accountants, a purchasing department and a shipping department. The export in some regions/countries is done via local distributors, able to provide the same services as MARTY Sports do in France.

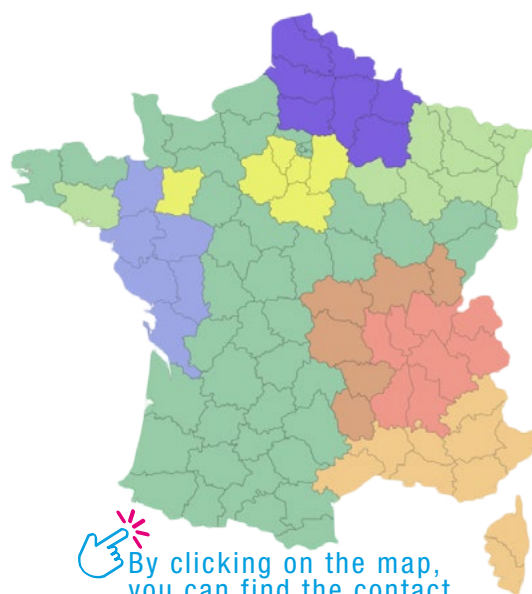

Installation

We have our own specialized and experienced installation teams who are fully equipped.
