HIGH COMPETITION POLE VAULT POSTS

NEW

NEW MODEL IAAF CERTIFIED.

Aluminium profile SPECIFIC MARTY diameter 125mm with completely integrated crossbar lifting system. Maximum height of the bar 6m40. Mini 2m40 and 1m80 by expansion. Lifting of the crossbar by a safe winch and cable system. Indication of the heights by metal tape in specific groove. Crossbar support height adjustment mounted on gallews integrated to the post in wide groove with self-lubricating castors and pads. Included metallic trolley mounted on 4 wheels diameter 100mm very soft manipulating and almost without play because the rails (NOT INCLUDE) are specifically produce according to the wheels dimensions.

3 model : 1 fix and 2 foldable manufactured according to our PATENT (N°03-12-902). Allowing the storage of the posts inside garages. Delivered with the sliding base but without the rails to fix in the ground. The pair.

A1910B Fixed model.

A1911B Articulated model at the posts base for pole vault pits 5m50 and less.

A1912B Articulated model at 1m00 from the ground for pole vault pits from 6m00 large and more.

IMPORTANT !

In order to make your choice easily, our pole vault stands have all the same sliding base adjustable on rails of 35,5cm wide.

MIND you need to add rails to your posts.
